WORK EXPERIENCE

Software Developer

IBM

06/2021 - Present

Achievements/Tasks

- Received XML input from DynamoDB, created JSON schemas, and architected XSLT transformations for the data
- Published complete data events to Apache Kafka topics for consumer use
- Collaborated with project owners using Agile Methodologies to determine project user stories and work efforts involved
- Refactored XPath references used by all team members, improving overall performance speed
- Built templates for repetitive work making XSLT transformations more straightforward and future refactors less complicated
- Investigated problems with software applications to diagnose root causes
